## **POPULATION OF SWEDEN 1840-1947**

This is a name searchable register of the household examination/congregation records between 1840 and 1947 for all of Sweden. The index record displays the following information about the person: name, birth date, birth place and current residence (time of the household record). Members of the household are displayed along with a direct link to the original record. A link to the birth book for the person is also included. If the person died, often you will find a link to the death book.

Remember children had no surnames while they lived with their parents, so one should try searching in some cases only with given names. Note – household/congregation records

were not created for many parishes in Stockholm city beginning in the 1870's. Included are records from the Stockholmsarkivet for the years 1878-1926 with a link to the original record.

#### ***ADVANCED SEARCH FEATURES***

You can search by name, birth, census or residence and household. You can search by first name, last name, gender or a combination of these fields in the birth section of the advanced search function. In the birth section, you can search by birth date or select between years (for example births between 1865 and 1870). The entry format for the birth date is YYYY-MM-DD. One can also search by birth parish, birth county or birth country (if the birth country is not Sweden). The household search possibility is one of the most exciting and usable. Here one can combine information about persons living together in a family in order to find matches in cases where one does not have a lot of information about the family. One can include multiple persons in the household in the search by clicking "Add person".

#### ***POPULATION OF SWEDEN 1940***

The Population of Sweden 1940 is a name searchable index for all who lived in Sweden on the 31<sup>st</sup> of December 1940.

The source material for the Population of Sweden 1940 consists of the extracts sent to Statistics Sweden that were used to create the 1940 census. Most of the extracts are from the source titled: "*Utdrag ur församlingsbok den 31 december 1940 och mantalsuppgift för år 1941* (Extract out of the congregation book on December 31, 1940 and tax information for the year 1941)". However, in Stockholm City, no congregation books were created for most of the large parishes at that time. The source for the population census for these parishes comes from "*Utdrag ur Stockholms stads civila folkregister den 31 december 1940 och mantalsuppgift för år 1941* (Extract from Stockholm City population register on December 31, 1940 and tax information for the year 1941)".

Nonetheless, it is often possible to infer additional information. If a man and woman in the same household have the same marriage date, for example, they most likely are married to each other.
