

MemoryWeb

## The photo organizer for family historians

### Upload images with details from:

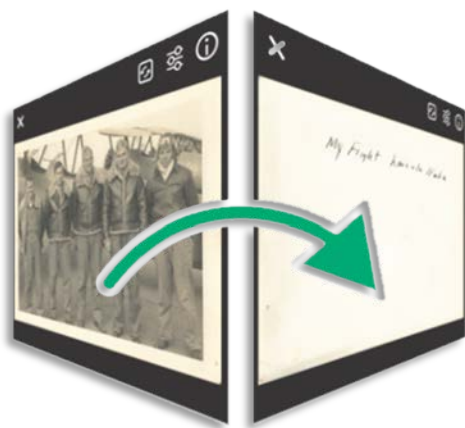

Desktop computer, Dropbox, Facebook, FamilySearch, Flickr, Google Drive, Instagram and iOS

### Edit/add tags

People, date, location, album, caption, keywords, related image, copyright details and more

### Explore photos in new ways

- People profile page with age scroll
- Interactive world map
- Interactive family photo trees
- Interactive tags
- Front/back photo flip

### Tag articles, artifacts and records

Connect “faceless” images to people. Facial recognition will get the rest.

### Share photos selectively

- As a private web album with details
- As albums where family can add their own pictures and comments but can't change your tags
- As individual photos with your tag details inside and out

### Export with metadata, inside & out

- “ Mom hanging out with her teacher friends
